Summary

Frontend Developer with **4+ years of software development experience** specializing in **React.js, JavaScript and TypeScript**. Experienced in developing enterprise applications across **wealth management and supply-chain domains**, with hands-on expertise in **Next.js, REST APIs, Node.js and MongoDB**. Hands-on experience with **frontend architecture, scalable data loading, background processing and AI-assisted development** using Claude, Cursor, Codex, ChatGPT and GitHub Copilot.

Core Skills

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

Programming & DSA: Java, Data Structures & Algorithms, Problem Solving, Object-Oriented Programming

Frontend: React.js, Next.js, React Hooks, Redux, State Management, Responsive Design

Backend: Node.js, Express.js, RESTful APIs, MongoDB, JWT

System Design & Architecture: Component Architecture, REST API Architecture, Pagination, Infinite Scrolling, Background Job Scheduling, Asynchronous Processing

Testing & Tools: Jest, React Testing Library, Git, GitHub, Bitbucket, Jira, Postman, NPM

AI-Assisted Development: Claude, Cursor, Codex, ChatGPT, GitHub Copilot, Antigravity

Work Experience

Aimleap, Bangalore Oct 2025 – Present

RADAR — Supply Chain Risk Intelligence Platform

- Engineered **React.js/Next.js** workflows for supplier risk, network analysis, alerts, risk scores and interactive visualizations across **3 core risk-analysis API workflows**.
- Implemented **offset-based pagination and infinite scrolling** to progressively load large datasets, improving responsiveness across data-intensive application screens.
- Optimized rendering and API state management, contributing to a **15% reduction in UI-related issues** during testing cycles.

ANNISE — Wealth Management Application

- Developed **React.js/Next.js** features for dashboards, financial data workflows and user-specific experiences within a wealth-management platform.
- Implemented **RBAC** to control feature and data visibility across user-specific workflows and permissions.
- Delivered features and resolved production issues within a **6–10 member cross-functional team** spanning frontend, backend, QA, product and design.

PRICELEAP — Price Tracking Product

- Contributed across **React.js, Node.js, Express.js and MongoDB**, working across frontend and backend application layers.
- Designed a **cron-based background job scheduling architecture** to automate recurring workflows and decouple scheduled processing from synchronous user requests.
- Developed **asynchronous, API-driven workflows** to separate background processing from user-facing operations and support scalable application architecture.

Capgemini, Kolkata Dec 2022 - Jan 2025

Panasonic Singapore — Enterprise Application

- Developed enterprise interfaces using **React.js, JavaScript and TypeScript**, focusing on maintainable UI architecture and business workflows.
- Built a **Virtual Customer Service Chatbot** integrated with backend services and external REST APIs, improving internal query resolution efficiency by **40%**.
- Troubleshot frontend/API issues with backend and QA teams, contributing to a **25% reduction in frontend-related defects** during QA cycles.

Worksbot, Bangalore Jan 2022 - Mar 2022

Full Stack Developer

- Developed **React.js and Node.js** applications for interactive dashboards and internal business management tools.
- Built reusable interfaces and integrated backend APIs across multiple Proof-of-Concept applications.

Lyearn, Gandhinagar June 2020 - Mar 2021

Front End Developer

- Developed responsive websites using **HTML5, CSS3, JavaScript and Bootstrap**, ensuring cross-browser compatibility.
- Applied **Jest and React Testing Library** for component validation and frontend quality.

ACHIEVEMENTS & CERTIFICATIONS

Winner — Generative Artificial Intelligence Hackathon 2024, DCX Global, Capgemini | **Advanced React — Scrimba**

Education

Gandhi Engineering College (BPUT), Bhubaneswar Aug 2018 - July 2022

B.Tech. in Computer Science and Engineering ***CGPA: 8.79/10***
